

Mesh Drape Installation

LOCATION:
Mungari – White Foil Pit

CLIENT:
Evolution Mining

DURATION:
5 months

PROJECT SCOPE

Ausdrill Geotechnical team included specialised rope access technicians and equipment to complement our existing drill & blast activities with the open pit operation in the Western Australian Goldfields. The project scope included supply and installation of 25,000m² of a Geobruigg Deltax rockfall mesh system to ensure the safety of the mining operation. The project was supported by our local Kalgoorlie branch and delivered to the client in a timely manner.
